

PARTICIPANT: monica johnson
ADDRESS: 125 cameron dr
nicholasville , KY 40356
DOB: Mar 30, 1959
GENDER: Female

ORDER: 1464
PRODUCT: Whole Exome Sequencing
SAMPLE TUBE ID: 71161510240931
SAMPLE TYPE: Saliva
DATE OF COLLECTION: Feb 06, 2017
DATE RECEIVED: Feb 10, 2017

PHYSICIAN: Dr. Mervyn Sahud, MD
ADDRESS: 16205 Norton Road
Healdsburg, CA 95448

RESULTS

Number of Loci with Identified Variants

45,606

Knowing the complete DNA sequence of an individual's genome does not, on it's own, provide useful clinical information. If you have any questions or concerns about what you learn through your genome sequence information, you should contact your physician or a genetic counselor.

Genos Laboratory provides variant annotations using a validated process. Genome sequencing is performed using next generation sequencing by Macrogen Clinical Laboratory (CLIA ID: 21D2062464), located at 1330 Piccard Drive, Ste 103, Rockville, MD 20850. The performance characteristics of this product were determined by Genos Laboratory. No reference range has been determined for this product. It has not been cleared or approved by the U.S. Food and Drug Administration. Genos is not intended for diagnostic use. It does not provide interpretation or risk assessment reports.
